
AIRLIFT

Design Internship

AIRLIFT

Job Title

Design Internship

Role

Design Interns should exhibit a wide range of graphic design skills that they can apply to multiple project types, from the creation and application of service and product brand identity systems to digital interfaces that live across devices and platforms. In addition they like all designers need to continuously hunger for improvement, driven by their passion for the design process.

Interns are expected also to take part as key members of the team and should be expected to help provide constructive creative input and support during all phases of the design process. They should provide constructive feedback, play a role in client engagements and should be comfortable presenting and communicating their design work to their peers.

All employees of Airlift are the ambassadors of the company and should promote Airlift's core values and standards at the highest level.
